SKILLS

Technical Skills | Javascript, React, NextJs, Express, NestJS, TypeScript, CSS, HTML, PostgreSQL, MySQL, PHP, Python, Java, C
Interpersonal Skills | Problem Solving, Tenacious, Adaptive, Easily taught, Team Player, Sociable

PROJECTS

SHOT Café POS (Full-Stack) | React | TailwindCSS | TypeScript | Express.js | PostgreSQL | Prisma

- Developed a full-stack POS system with dynamic order management and inventory tracking, implementing role-based authentication for secure access.
- Utilized TypeScript in the backend with Prisma for type safety and efficient data handling, ensuring reliable API interactions with PostgreSQL.

Clockium: Time-in/ Time-out (UI/UX, Frontend) Figma | React | TailwindCSS

- Designed a prototype and developed a time management system for tracking employee attendance and monitoring working hours, utilizing React and Tailwind CSS.
- Collaborated closely with back-end developers to ensure seamless data flow between the front-end interface and the server, optimizing the overall user experience.

JLRC SpeakeEZ(Full-Stack) | NextJS | TypeScript | TailwindCSS | NestJS | PostgreSQL | Prisma

- Worked in a small team to develop an ESL (English for Second Language) tutor booking platform for helping Japanese students learn English with subscription-based model, focusing primarily on the frontend design and ensuring an intuitive, user-friendly experience for students, tutors, and admins.
- Utilized Next.js, TypeScript, and Tailwind CSS to build dynamic interfaces, while also integrating backend functionality to manage tutor accounts and educational materials.

EXPERIENCE

Frontend Developer

Hacktiv Colab Inc. | *September 2023 - October 2023*

- Created the **Clockium** application, a time management tool designed to enhance productivity through an intuitive user interface and streamlined functionalities.
- Collaborated with cross-functional teams to refine application features, ensuring a user-friendly experience and meeting project specifications.

Full-Stack Developer

JLRC | *November 2024 -April 2025*

- Contributed to the development of **SpeakeEZ**, an ESL website focusing on frontend design, building user interfaces for students, tutors, and admins, and ensuring seamless functionality across the platform.
- Managed backend admin tasks, including tutor account creation and CRUD operations for educational materials, while maintaining smooth integration between frontend and backend systems.

EDUCATION

Polytechnic University of the Philippines -Manila

Bachelor of Science in Computer Science

- GPA per semester - 1.46, 1.25, 1.69, 1.46, 1.46, 1.39, 1.50, 1.38
